Career Objective

To combine my strong skills in WordPress and UI/UX development with my Computer Science background to create innovative, responsive, and dynamic web solutions. With solid proficiency in web development fundamentals, I focus on delivering aesthetic, user-centered designs while improving engagement through SEO and content strategy.

In addition, I now integrate AI tools into my workflow to create modern brand identities, visual systems, and scalable design solutions.

Profile

I have designed and developed commercial websites, gaining strong expertise in WordPress and interactive multi-page web applications. I combine web development fundamentals with UI/UX principles to build responsive, user-centered and functional digital products.

I also actively integrate modern AI applications and tools into my workflow to improve design quality, accelerate development processes, and create more efficient and scalable solutions, especially in branding and web-based projects.

My experience as a barista, waiter, cashier, and retail assistant has strengthened my time management, customer communication, and ability to perform efficiently under pressure in real-world environments.

I am experienced in both Windows and Linux systems, including terminal usage and package management. I believe in continuous learning and get used to learn German not to be stupid again

Writing is one of my strongest passions. I analyze impactful scenes from films and transform them into essays and short stories. I have also written basketball-related articles, which I publish on:

- akil.works/news
- medium.com/akilworks

In my personal life, I enjoy cycling, experimenting with coffee brewing techniques, and cooking.

Education

- **Anadolu University** – Management Information Systems (2019–2023)
- **Eskişehir Technical University** – Statistics (2015–2020)
- **Dumlupınar University** – Computer Programming (2011–2013)

Professional Experience

2022/02 – Present: WordPress / UI/UX Developer & Designer & AI Humanist

I specialize in designing and developing responsive web products that seamlessly adapt to different screen sizes and devices, with a strong focus on mobile-first experiences. My goal is to deliver user-friendly, functional, and performance-driven interfaces that balance aesthetics with usability.

In my work, I build custom, tailored solutions based on each client's specific needs, focusing heavily on user experience and practical outcomes. I continuously integrate modern web technologies and AI-powered tools into my workflow to improve design quality, speed up development, and create more efficient and scalable digital solutions.

I use tools such as WordPress and Elementor to design and develop websites aligned with business goals, while also leveraging AI-assisted design and content systems to enhance creativity and consistency across projects. Every project reflects my commitment to building impactful, modern, and visually strong digital experiences.

I stay up to date with current web trends, frameworks, and AI-driven development methods, allowing me to add continuous value to each project I work on.

I am always open to collaboration and new opportunities, and I enjoy working on ideas that combine design, technology, and intelligent automation to bring concepts to life.

2020/06 – 2021/04: WordPress & UI/UX Developer

I contributed to enhancing portfolio websites tailored specifically for local Real Estate Agents (REAs), Civil Engineers, craftspeople by integrating user-friendly design elements, advanced features, and content that effectively showcases their unique projects, achievements, and services. My contributions included the integration of user-friendly design elements, advanced features, and compelling content that effectively showcases their unique projects, achievements, and services.

These websites were meticulously developed with an emphasis on creating visually appealing and mobile-responsive platforms. They featured detailed project galleries, client testimonials, interactive elements such as virtual tours, and informative blogs. This comprehensive approach aimed at showcasing industry expertise and attracting a wider audience of potential clients.

2020/06 – 2020/07: Artı Metrik Bilişim Tek. San. Tic. A.Ş. – Jr. Front-End Developer

I have attained extensive experience in understanding team dynamics, including collaboration, communication strategies, and workflow management. This experience has enabled me to observe and actively contribute to effective teamwork, problem-solving within group settings, and the coordination of tasks to achieve shared objectives.

Through this process, I have gained valuable insights into the significance of leadership roles, the art of delegation, and the necessity of fostering a productive environment that promotes both individual and collective growth.

2014/01 – 2020/05: Web Developer

I spent a lot of time working with HTML, CSS, and JavaScript, building small projects and experimenting on my own to strengthen my understanding of front-end development. This hands-on process helped me gain practical experience in website creation as well as a better understanding of basic network infrastructure, while improving my overall technical problem-solving skills.

2018/05 – 2020/04: Hangover Plus – Bar Waiter

I worked as part of a prominent company, Namlı Otelcilik, in Eskişehir, where I developed a strong sense of self-confidence in the fields of gastronomy, beverages, and cocktail preparation. This experience enhanced my understanding of customer service and how to effectively meet the diverse needs of clients. I believe that many individuals have similar experiences that contribute to their professional growth and expertise in hospitality.

2018/03 – 2018/10: Yeni Mağazacılık A101 – Cashier/Shop Advisor

I have acquired a diverse skill set, driven by a strong passion for success and resilience. Taking a much-needed break served as a crucial opportunity for reflection, akin to taking a deep breath, which was essential for personal growth and reigniting my motivation. I highly recommend this role to anyone who may feel overwhelmed, as it provides valuable insights and a supportive environment conducive to development.

2015/03 – 2015/10: Parende – Story/Essay Writer

My stories have been published in print media, showcasing my ability to craft engaging narratives that resonate with readers. This achievement highlights my dedication to storytelling and my ability to engage diverse audiences through traditional publishing channels. The experience of seeing my work in print has not only been gratifying but has also motivated me to continue honing my writing skills and exploring new themes and genres in my future projects.

2014/07 – 2015/03: Genç Yazı – Story Writer

I shared my written pieces across these platforms, and this experience significantly elevated my enthusiasm and motivation. Engaging with a wider audience has not only inspired me creatively but also reinforced my allegiance to producing high-quality content. The positive feedback and interactions from readers further invigorate my passion for writing and drive me to explore new themes and ideas in my future work.

2013/08 – 2014/07: Eskici – Story/Essay Writer

My stories and articles have been published in both print and digital media outlets, marking a significant milestone in my writing journey. This achievement not only demonstrates my ability to engage diverse audiences but also serves as a strong step forward in establishing my credibility and expertise in the field.

I am committed to continuing to share compelling narratives and insights that resonate with readers across various platforms.

2013/08 – 2014/07: Sistem Computer Tech. – IT System Administrator (Intern)

During my internship, I focused on developing my skills in web technologies and network management. This experience allowed me to gain practical knowledge and hands-on experience in building websites and understanding network infrastructure, enhancing my technical proficiency in these areas.

Technical Skills

- **Development:** WordPress, Elementor, HTML, CSS, JavaScript
- **Tools:** VS Code, Google Chrome
- **AI Tools:** ChatGPT, Gemini (prompt engineering & practical implementation)
- **Operating Systems:** Linux GNU (terminal & package management)

Personal Interests

- Cycling
- Coffee brewing and roasting techniques
- Cooking
- Film analysis and storytelling

If you'd like, I can now:

-  Optimize it for international tech jobs & branding (more minimal & impact-focused)
-  Create a UX/UI style staff
-  Rewrite it specifically for WordPress Developer roles
-  Make it more "tech-heavy" and reduce hospitality history
